REMARKS/ARGUMENTS

This paper is submitted responsive to the Office Action mailed February 11, 2008. Reconsideration of this application in light of the accompanying remarks and amendments is courteously solicited.

Initially, the undersigned and applicant would like to thank Examiner Mondt for courtesies extended during a telephone interview which was held on June 17, 2008. During that interview, agreement was reached as indicated in the interview summary issued by the Examiner on June 20, 2008, that amending claim 15 as has been done in this paper would overcome the present rejections under 35 USC 112, first paragraph, and 35 USC 103(a) based on Oh and Mayet.

Claim 15 has been amended as outlined above, and is the only independent claim in the application. It is believed that this claim is in condition for allowance. Dependent claims 10-14 and 16 all depend directly or indirectly from claim 15 and are believed patentable based upon this dependency. Further, new claims 17-20 have been added and these claims further highlight the difference in structure between the vertical support part and the inner support part of claim 15. These claims are believed to be patentable based upon their dependency from claim 15 and also in their own right.

An earnest and thorough attempt has been made by the undersigned to resolve the outstanding issues in this case and place same in condition for allowance. If the Examiner has any questions or feels that a telephone or personal interview would be helpful in resolving any outstanding issues which remain in this application after consideration of this amendment, the Examiner is courteously invited to telephone the undersigned and the same would be gratefully appreciated.
